

Final Exam Practical

Follow the below instructions **carefully** to complete the Final Exam Practical component. Please do not share answers or files during the exam.

You will be creating a website based on a recipe you know. This could be your most recent meal, something you had yesterday, or a family recipe. **Please keep it short, the purpose of this exercise is for you to use all the correct HTML/CSS syntax which should be your focus.** The recipe does not have to be exact or complete, but should have content relevant to the end result.

Part 1 (4 marks):

1. Make a new folder called **MyRecipe**.
2. In the **MyRecipe** folder, create a **css** folder.
3. In an IDE, open the **MyRecipe** folder as a project.
4. Create a **new file** in the root of the **MyRecipe** folder and name it **index.html**.
5. Add in the base HTML structure which should include the following:
 - All required HTML tags (opening/closing) for a proper, accessible website
 - The doc type
 - Language type
 - Page title (The name of your recipe)
 - Proper character set

Part 2 (3 marks):

6. In the **head** section, add the following:

```
<link href="css/index.css" rel="stylesheet" type="text/css"/>
```

7. Between the **body** tags, add the following code:
 - Add an **h1 tag** and add the name of your recipe.
 - Under the **h1 tag**, add an **h2 tag** with the text **Description**.
 - Between the **h1 and h2 tags**, add a **horizontal rule**.
 - After the **h2 tag**, add a **paragraph tag** with a short description of the recipe.
 - Add another **horizontal rule** after the **paragraph tags**.

Part 3 (10 marks):

8. After the last **horizontal rule**, add an **h2 tag** with the text **Ingredients/Steps**.
9. After the **<h2>Ingredients/Steps</h2>** tag, add an **unordered list** with **at least 2 ingredients**.
10. After the **unordered list**, add an **ordered list** with **at least 3 steps**.

Part 4 (8 marks):

11. After the **ordered list**, add a **footer tag**.
12. In the **footer**, add a **copyright symbol followed by your first and last name**.

Part 5 (10 marks):

13. Create a **new file** in the **css** folder and name it **index.css**
14. In **index.css**, add the following:
 - At least 3 tags with styles applied
 - A total of 6 properties should be applied
 - Properties should be applied towards your tag styles (at least one property applied to a style)
 - 6 unique properties are to be used
 - Make sure your foreground and background colours are accessible!!
15. **Save** and make sure it looks correct.
16. Once complete, **save the project files (MyRecipe folder) in a zip file with the following: YourName-FinalExam.zip**, then submit it to the Final Exam – Practical assignment folder for review.
